LOCALBUZZ · PROJECT POSTER Abdulkadir Shaikh · Enrollment No. 202403103510131 · B.Tech CSE · Uka Tarsadia University

Find it nearby. Before you step out.

A hyperlocal product-discovery platform that shows which nearby shops have a product in stock, at what price, and how to get there.

1 Problem Statement

- **Wasted trips:** shoppers visit or phone several shops just to check whether one product is in stock.
- **No price visibility:** prices at nearby stores cannot be compared before leaving home.
- **Digital gap:** small shopkeepers lack a simple, low-cost way to publish stock and reach nearby buyers.

2 Proposed Solution

- **List:** shopkeepers register, build a shop profile and publish products with price, photo and stock status.
- **Search:** customers find a product, compare shops by price and locality, and see who is open now.
- **Go:** one tap opens the shop profile or directions. No customer sign-up, no checkout.

3 Key Features

CUSTOMER
Smart Search
By product, brand or shop, with category and locality filters

CUSTOMER
Price Compare
Sort low to high, "Lowest price" badge, in-stock only

CUSTOMER
Live Open/Closed
Status worked out from shop timings and weekly off

CUSTOMER
Shop Page + Directions
Full catalogue, contact, one-tap route

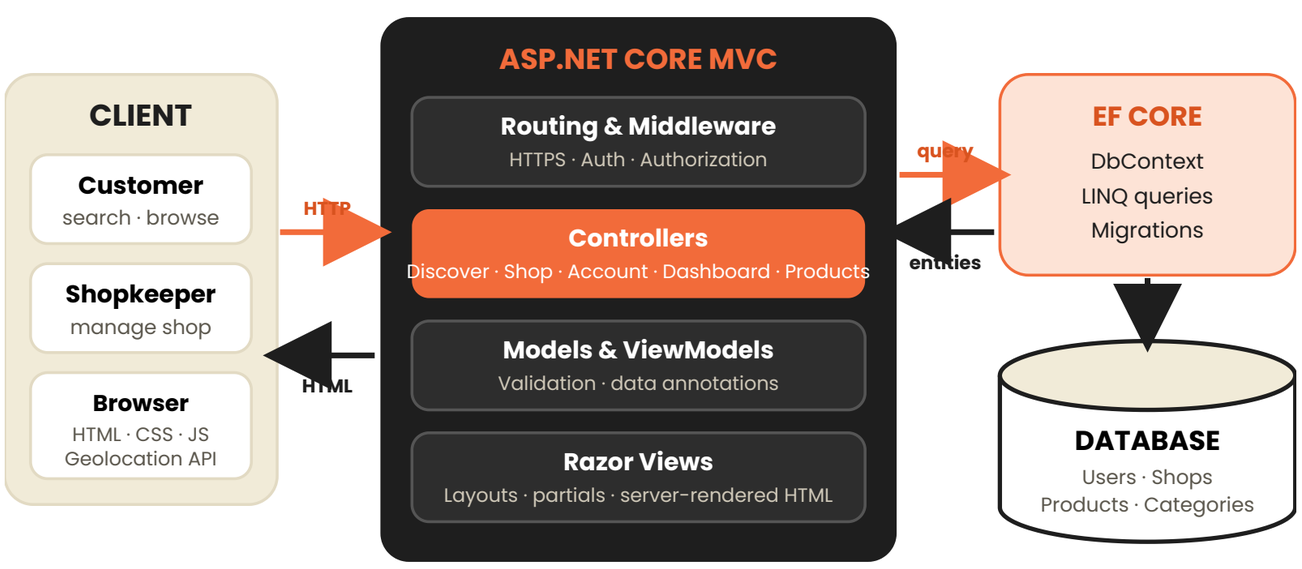

SHOPKEEPER
Register & Login
Create an account and set up a shop in minutes

SHOPKEEPER
Shop Profile + Geo
Hours, WhatsApp, "Use my current location"

SHOPKEEPER
Product CRUD
Add, edit, delete with price, photo and stock

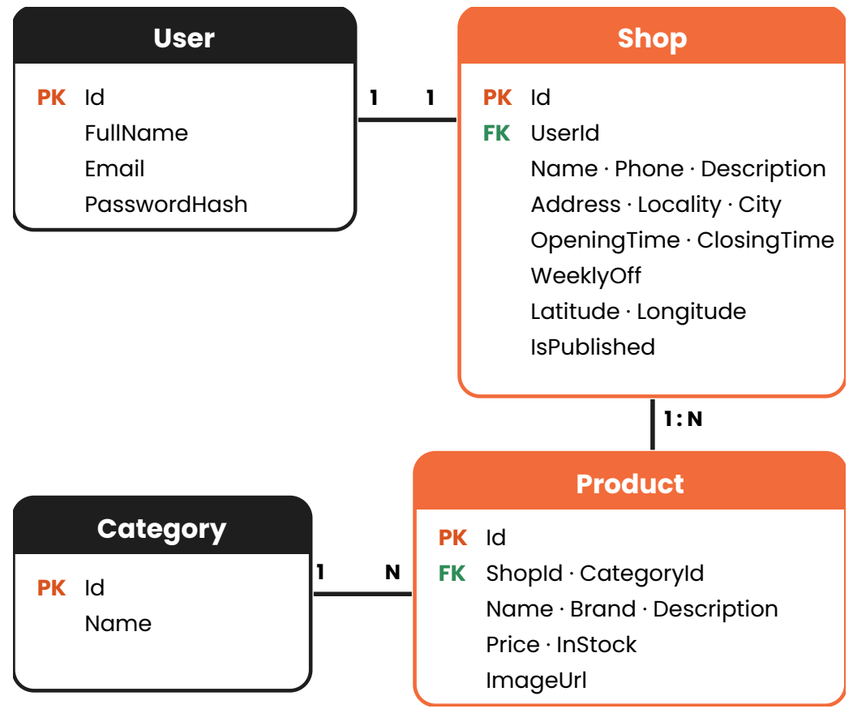

SHOPKEEPER
Insights & Publish
Stock stats, and show or hide the shop instantly

4 System Architecture

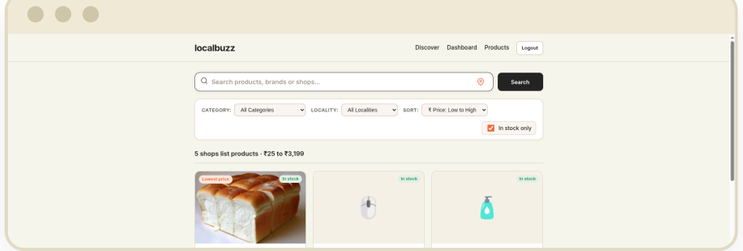

Request flow: Search → Controller → EF Core LINQ filter (stock · category · locality) → Database → ViewModel → Razor View

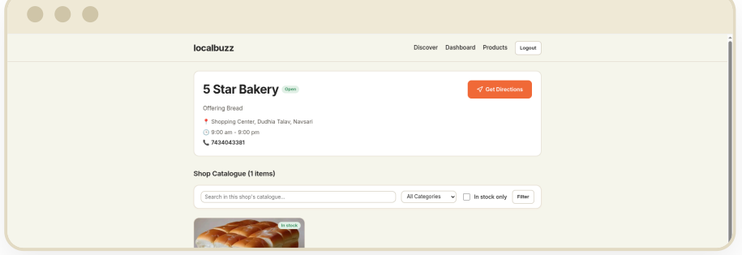

Data Model

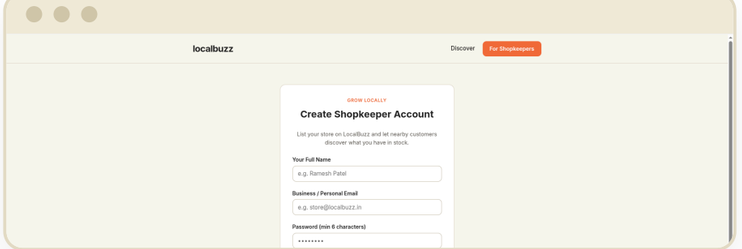

6 Application Screens

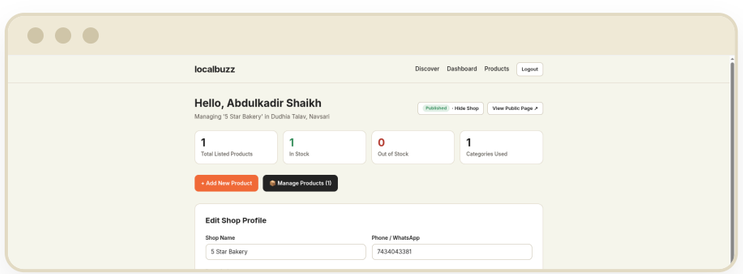

Discover & Search

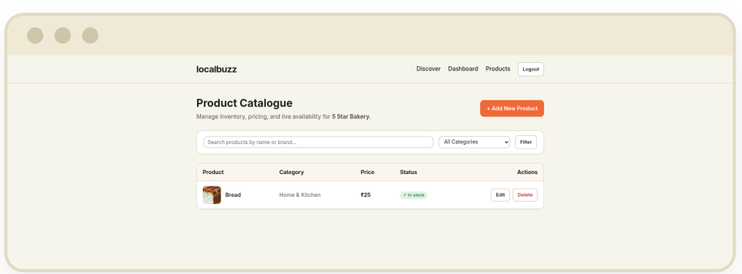

Shop Profile & Catalogue

Shopkeeper Registration

Shopkeeper Dashboard

Product Catalogue

CUSTOMER JOURNEY

1. Search a product
2. Compare nearby shops
3. Get directions & go

How it works

Future scope: distance-based ranking · ratings & reviews · WhatsApp enquiry · multi-language UI · POS sync
